

HOW TO ROLL YOUR SCARF

After you have ironed your scarf place it on a clean, flat surface as shown below.

Roll the scarf tightly from the centre smoothing out the ends as you go.

Try to ensure that the scarf remains the same tightness from the middle to the end. It is quite easy to leave one of the ends behind! Try to maintain the consistency.

Continue rolling until the point of the scarf is about as long as your hand span.

Your rolled scarf should like nice and neat like this.

Now put it around your neck with the blue to the right shoulder; secure it with your woggle and you could finish by learning to tie a friendship knot in the end.
